If your insurance is not on this list, your visit may be considered Out-of-Network. Out-of-Network means that Myrtue is not contracted with the insurance company. This can lead to higher out-of-pocket costs, lack of service coverage by your insurance, and additional authorization and referral requirements. If you choose to proceed with Out-of-Network services at Myrtue, you may be asked to sign additional paperwork acknowledging your coverage differences, and agreeing to the potential costs associated with Out-of-Network care.

If you have questions on your insurance coverage and network status, please speak to one of Myrtue's Patient Financial Advocates.

\*For emergent medical care, please go to your nearest Emergency department. Emergency visits are not typically subject to network limitations.
